Matrimatic Gold: Using the memory function

|	
1 	Turn on the machine. The machine shows straight stitch 001.
2 	Push the memory button(ME= memory). The button turns green and on the screen you'll see the word : « memory ». On the right side "01" flashes. matri **www.matri.eu**
3 	Choose the first stitch (in our case stitch no. 110) and use the numbers to add the stitch. Every stitch can be mirrored, push the mirror button **before** choosing (MI=mirror).
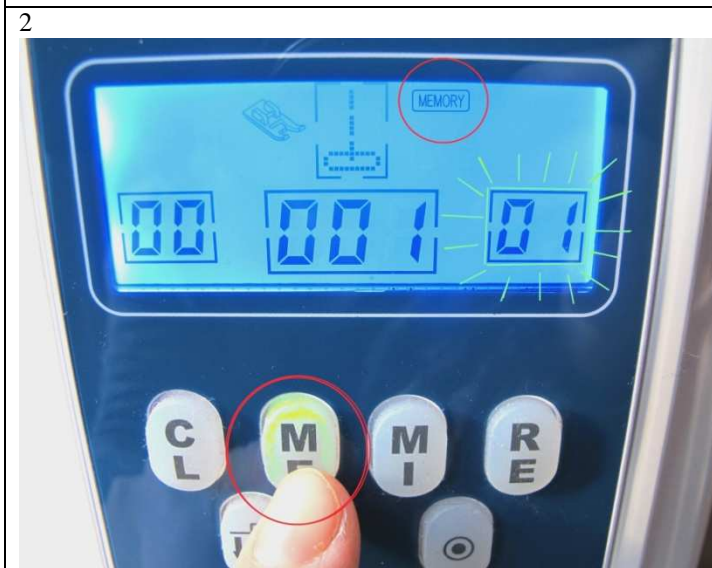

|	
4	On the screen you'll see the image of stitch110. On the left, you'll see you have memorised the first stitch. On the right "02" flashes. It means you can now add the second stitch.
5	Choose the second stitch (in our case stitch 116). matri www.matri.eu
6	Choose the third stitch (in our case stitch 054).

7

You can now start sewing the stitches (see image 8, we sew without the footcontrol). The machine stitches the three stitches and stops.

You can also use the button repeat (RE= repeat). The machine will continue stitching the choosen stitches.

8

Start stitching, first on a piece of fabric for testing to see if the stitches please you.

9

If you push the memory button again, you'll get out of the memory menu. The button will not be green anymore and you'll loose the choosen stitches.
